**Konstantin Noskov**  
Russian Minister of Digital Development, Communications and Mass Media

nection, software, cloud computing, mobile solutions, and security.

It is great that this event is a platform for cross-sectoral cooperation between manufacturers and consumers of the ICT products and solutions and a thorough discussion of the most relevant issues of the IT industry based on innovative technologies within a comprehensive program of supporting events. An extensive participation of leading Russian and foreign IT companies in Russian Week of High Technologies 2019 offers opportunities for information exchange and extension of international cooperation.

Focused on the digital transformation of this country, Russian Week of High Technologies shows the main global trends and the latest developments in telecommunications, DC, Internet con-

**Maxim Akimov**  
Deputy Prime Minister of Russia

The Week's agenda includes the most important issues of this country's development. It is a search of new high tech ways for growth of national economy, development of breakthrough technologies for AI, mobile and satellite communications for optimisation of public administration and cybersecurity.

The Russian Government pays great attention to the national strategy of digital development which includes promotion of Russian-made solutions in the global market.

**Oleg Dukhovniksky**  
Head of the Federal Agency of Communications (Rossvyaz)

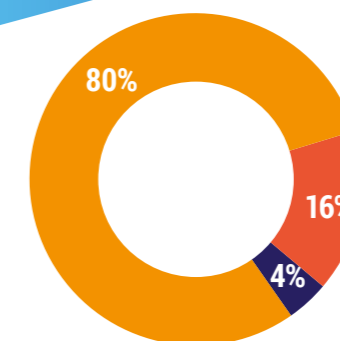

Development of communications and telecommunications is essential for the Russian economy. It is highly important to support the growth of domestic technology and reduce dependence on imports.

As usual Sviaz brings together representatives of government legislative and regulatory bodies, private companies, relevant ministries and departments of Russia and other countries, telecom operators, developers and manufacturers of telecom equipment and other market participants to discuss and exchange opinions in the development of the telecom industry.
